## **Additional Information**

---

I love the way technology makes life simpler. I enjoy meeting new people and getting to know their prospects in the digital world. I have been enthralled with technology my whole life. I graduated Rayat-Bahra University in 2020 with a bachelor's in Information Technology. After college, I began my professional career, in which I developed various apps and worked with acclaimed companies, such as Netscape Labs and Edvaive non-profit. Most of my life was spent in Punjab, India and I very recently moved to the United States in hopes of more opportunities. The come-up of technology companies has always been very captivating to me and I would be enthused to work with any tech company, big or small. I enjoy learning and enhancing my abilities in any way possible. I am a very diligent worker and get tasks completed in a very timely manner. I also love any open-source community such as Linux because it gives me the freedom to use my imagination
